feet-on-the-ground Service Force, who ensure that
Cherise TAPRI is indeed India's most advanced & hygienic
vending eco-system

Tapri-Man

Hygiene-Man

Techno-Man

Keep your workforce healthy & motivated

Know more about our feet-on-the-ground service force

Say Hi! to your Hygiene-Man

"I shall visit you twice every month to ensure that your Tapri machine is hygienic and free of pests"

Our trained Hygiene & IPM specialists conduct an extensive machine hygiene check-up combined with a comprehensive implementation of IPM (Integrated Pest Management) for the machine & the surrounding area once every 15 days.

We understand that effective Pest control is extremely Crucial in order to maintain a safe & hygienic beverage drinking experience! Our Hygiene-Men visit every 15 days to conduct a deep machine-level hygiene check and to deploy pest-repellants using food-grade IPM Protocols around the machine and also in the surrounding area.

Integrated Pest Management System

Starts from the farm all the way till your vending machine

What is IPM?

Integrated Pest Management is a scientific approach that combines a variety of techniques to study the life cycle of pests and how they interact with the environment. IPM professionals can manage pests with the most current methods to improve management, lower costs and reduce risks to people and the environment.

IPM tools include :

- Study of surroundings
- Prevent development of pests
- Create environment to disrupt pests mating behaviour
- Use of food grade pesticides
- Deployment of herbal & natural pest repellents

The Benefits

- 1 Promotes a hygienic & healthy office environment
- 2 Reduces environmental risk
- 3 Reduces contamination
- 4 Protects non-target species through reduced impact of pest management activities
- 5 Reduces or eliminates re-entry interval restrictions
- 6 Alleviates public concern about pest and pesticide-related practices

Our specialists are fully equipped with N95 masks, gloves, hand sanitisers & suits as prescribed by WHO & MoHFW, and are specially trained in practising social distancing while on the job

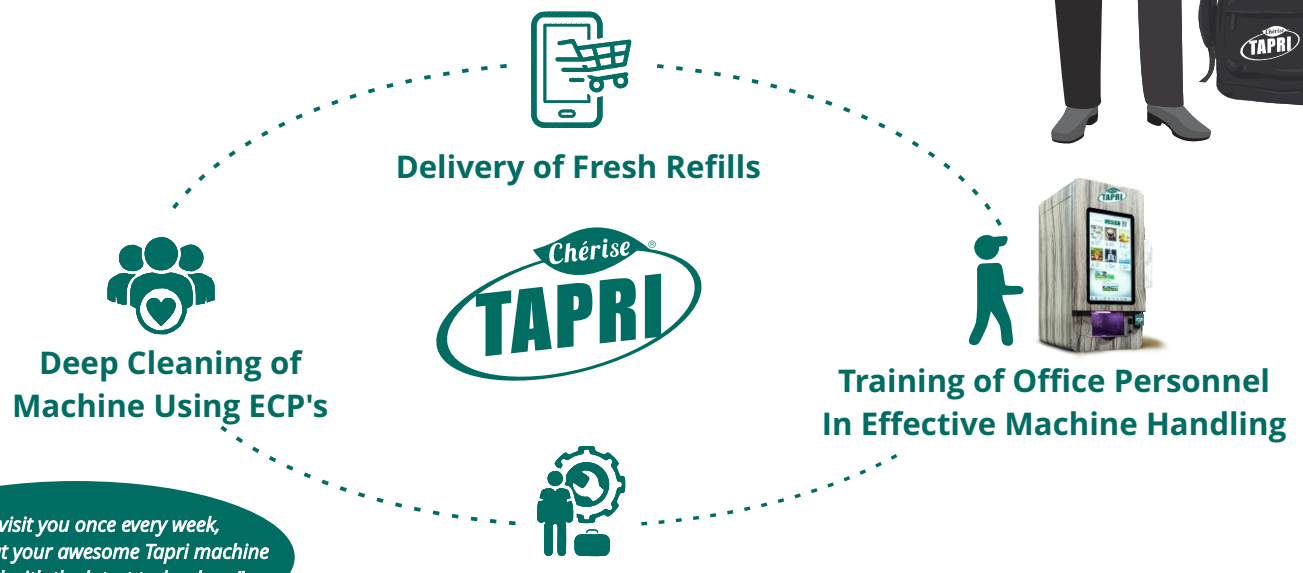

Greetings from your Tapri-Man

The most important aspect in any vending machine is Timely & Effective Cleaning! The machine cleaning is not just done just superficially but in a comprehensive manner.

Our trained Tapri-Men visit 2 times every week (that is 8 times a month) to not just deliver the refill packs, but to conduct deep & effective cleaning of your machine along with a performance check-up.

During these visits, we also educate your office peon on how to handle the machine effectively. Our Effective Cleaning Protocols (ECP's) are highly systemized and comprise of robust Standard Operating Procedures designed with the help of International Consultants.

"I shall visit you twice every week, 8 times a month to ensure that your Tapri machine is always refilled, super clean & always ready for you!"

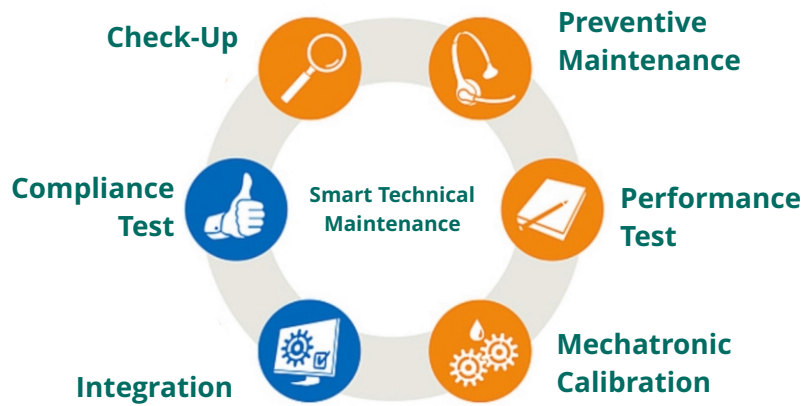

"I shall visit you once every week, to ensure that your awesome Tapri machine is updated with the latest technology."

Cherise TAPRI uses advanced & sophisticated technology. It is a smart Machine which runs on our proprietary IoT platform. In order to ensure seamless and continuous performance, our Techno-Men visit once every month to conduct an extensive technical check-up and assessment of the machine.

Your Techno-Man is here for you

Our specialists are fully equipped with N95 masks, gloves, hand sanitisers & suits as prescribed by WHO & MoHFW, and are specially trained in practising social distancing while on the job
